ACKNOWLEDGEMENT

The image used for the cover of this report was taken from the book "The Long Lines" which was photographed and published by Spencer Harding. I would like to thank Spencer for his permission to use this image.

The book contains a series of photographs of AT&T 's Skyway microwave radio relay network which was launched in 1951 to transmit telephone and television signals across the United States. The network consisted of 107 towers, each about 30 miles apart, with a cost of USD \$40 million to build. That would be equivalent to USD\$364.6 million in equivalent currency in 2015 terms using the consumer price index inflation since 1951 as a reference point.

The book may be purchased via PayPal for USD \$25 at the photographer's website, <http://spencerjharding.com/books/the-long-lines/>. If you are not located within the United States, the international shipping costs are an additional USD \$5.

This specific image is of the Owlshead tower in eastern California, USA. The tower is located in the southwestern corner of Death Valley National Park and borders the Naval Air Weapons Station at China Lake. There is no road to this site and the photographer traveled 42 miles off road to reach this isolated location. The tower is still owned by American Tower. The glow in the background is from Las Vegas, Nevada which is over 100 miles away from the tower.
